

An IBRC Jobs Watch Briefing

June 2010

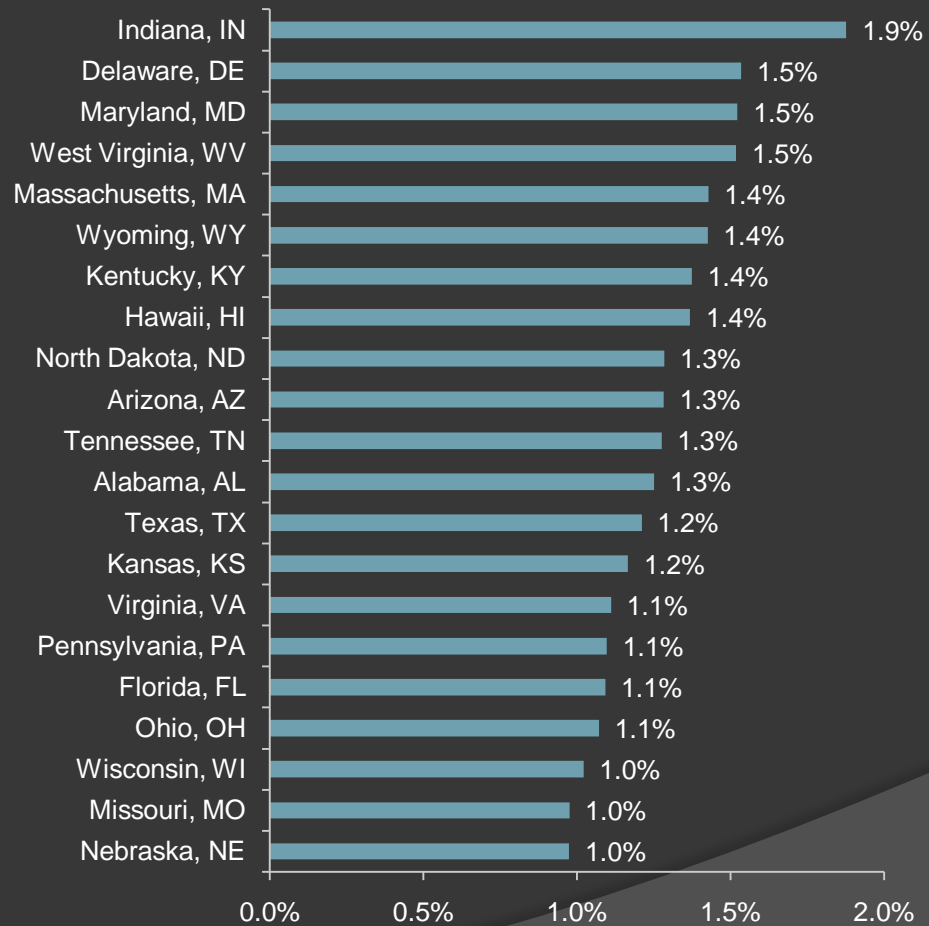

JOBS ARE *FINALLY* PART
OF RECOVERY

January to May 2010

- 52,000 jobs added in Indiana
- One-fifth of the new jobs were added in manufacturing
- More overtime (average hours per week clocked more than 43 in fabricated metals)

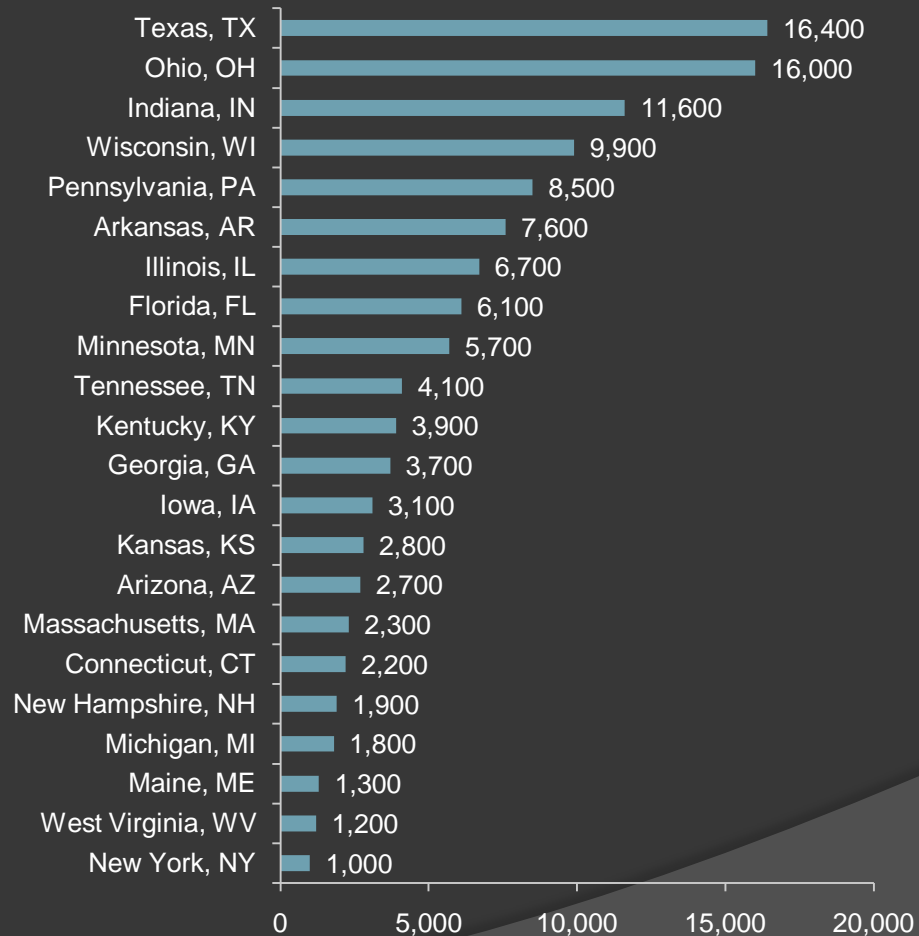

Indiana Job Gains

- Indiana outpaced every state this month, with a percentage increase in jobs between January and May at nearly 2%

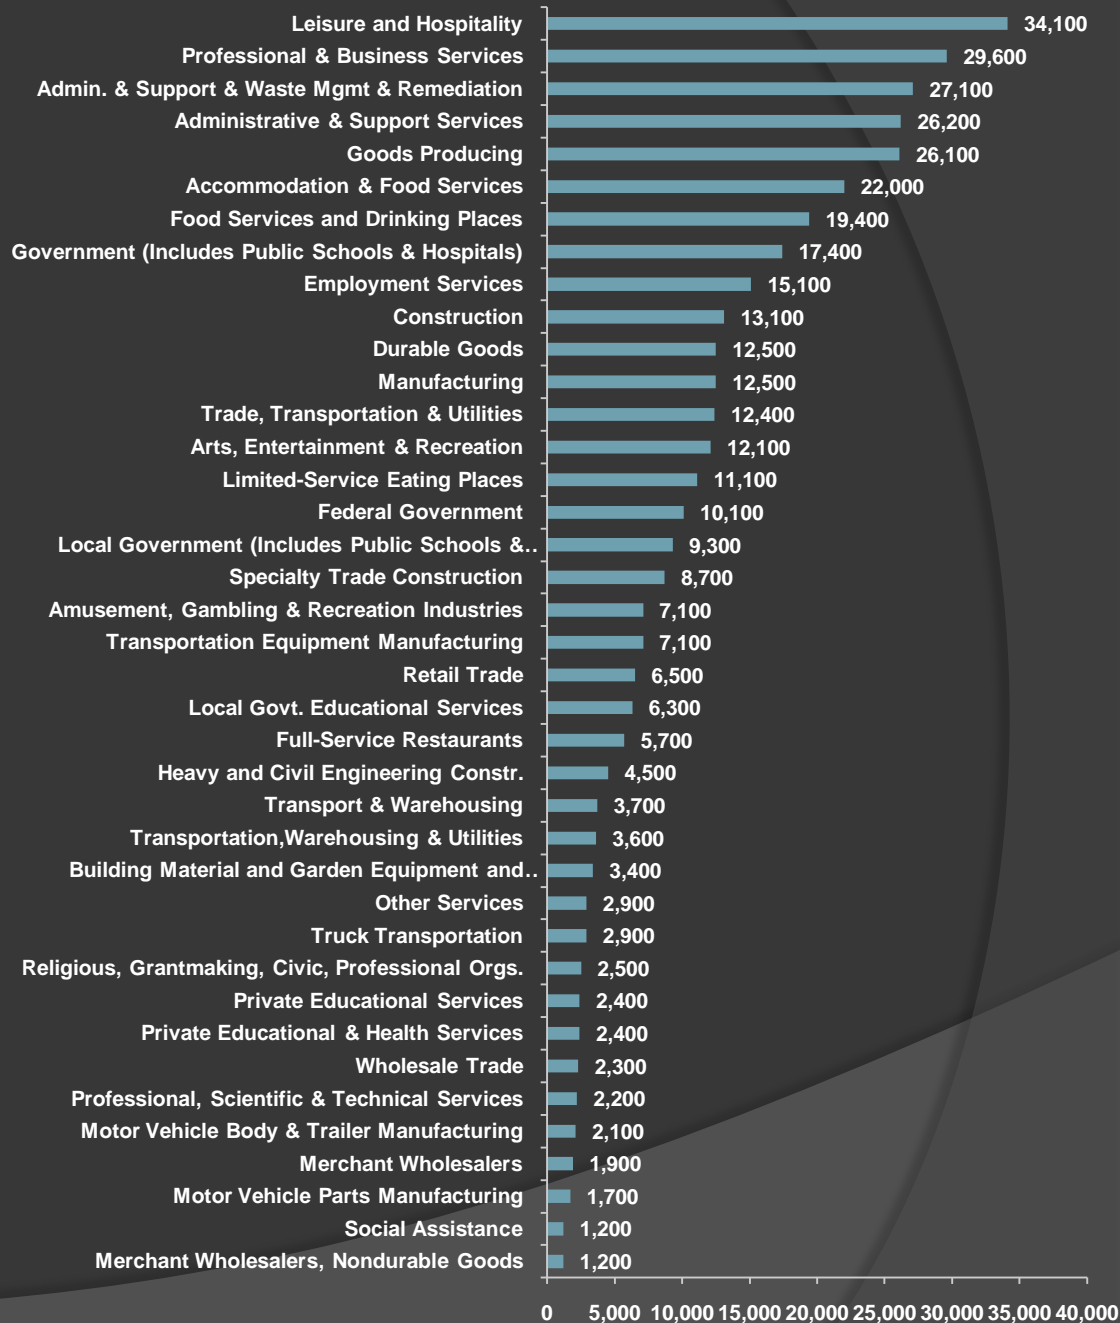

Top production states add jobs

- Indiana added nearly 12,000 jobs in manufacturing

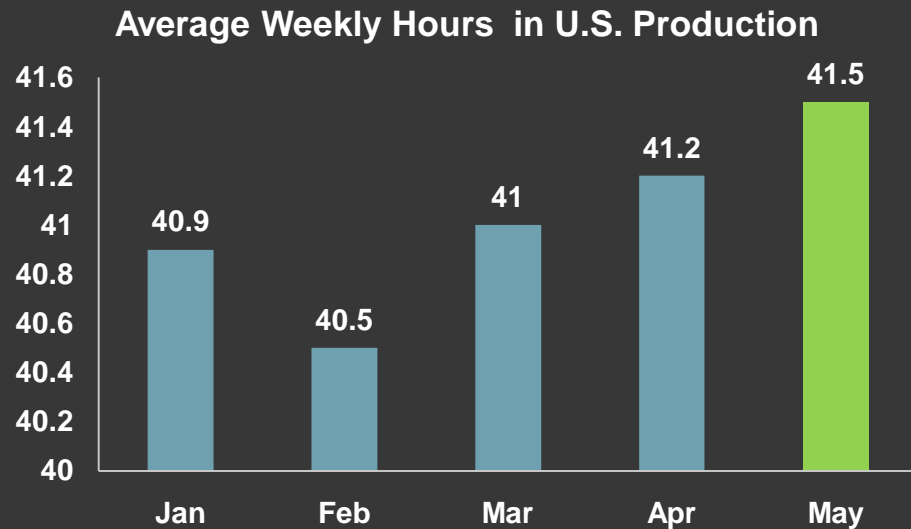

Where job gains occurred

- More than 37 sectors and industries saw job gains between January and May of 1,000 or more

Tipping Point Reached in Hours?

- With hours at nearly 42 a week (nationally), many firms have decided to start hiring again

Hoosier production hours are up

- **May: 42.6** January: 41.3
- **2.3 more** hours per week in non-durables
(from 38.7 to 41)
- 41.8 to **43.2 hours** for fabricated metals
(forging, stamping, bending, forming and machining)
